

SPEAKER

Chilufya Lombe

Director at Solid Green: Chilufya is a mechanical engineer with extensive experience in both design and compliance modeling for sustainability projects

TOPIC

The development of green buildings and greening existing buildings in South Africa

SYNOPSIS

Solid Green Consulting look at responsible building management and development focusing on the opportunities to improve cost savings through modifications to existing buildings and designing and building new ones. It will provide an overview of the GBCSA standards and guidelines and will touch on what implications the standards have had on the local construction industry.

PROFILE

Chilufya performed energy modelling for the first Green Star rated office and retail buildings in South Africa. With a background in traditional mechanical design, he has a special interest in detailed modelling of building systems to optimise energy usage using advanced building simulation tools such as Design Builder and Energy Plus. He is also a member of the Green Building Council of South Africa's education faculty and a member of their project assessment panel. With experience in both green star project management and all the required compliance modelling Chilufya often performs a dual function on projects.

DATE: Friday 07 March 2014
